WEBSITE STUDIO · KENYA

We build and improve websites for Kenyan service businesses.

Help customers find you, understand your services and feel ready to enquire. A defined scope, thoughtful design and tested delivery.

Choose the work you need

Website Improvement

Focused changes to your key pages, technical foundations and enquiry journey, with before/after evidence.

- Improvements across 1–3 key pages
- Agreed technical and visibility fixes
- One enquiry-path improvement
- Mobile and desktop quality checks
- Before/after evidence and handover

See Website Improvement

Launch & Impress

A clear home for your services, experience and contact options, designed around what your customers need to know.

- 5–8 business website pages
- Clear service and contact paths
- Mobile and desktop layouts
- Basic search engine optimization
- Documented handover

See Launch & Impress

For professional services, construction, interiors, home services and other service businesses. Custom ecommerce and integrations need a separate scope.

Start with a website scorecard - first completed report free per domain

OUR APPROACH, ILLUSTRATED

Before and after, explained.

Illustrative concept - not a client project. These fictional examples demonstrate design decisions, not measured results.

Home services

BEFORE / GENERAL INTRODUCTION

Welcome to our website

Services buried behind a general introduction, unclear coverage and a contact link at the bottom.

AFTER / CUSTOMER JOURNEY

Repairs and finishing

Named services, visible coverage, a practical project checklist and an obvious enquiry action.

View the next step

- Name the service
- Answer the practical questions
- Make the next step visible

See desktop and mobile compositions

Ecommerce · custom scope

BEFORE / GENERAL INTRODUCTION

Welcome to our website

An undifferentiated product list with little guidance on delivery, returns or the next step.

AFTER / CUSTOMER JOURNEY

Objects for your home

Clear product categories, useful item information and delivery and returns guidance near the shopping action.

View the next step

- Organize the range
- Explain the purchase
- Show the shopping route

See desktop and mobile compositions

Ecommerce is custom scope outside our standard business-website package. No sales, conversion, speed or search uplift is claimed.

THE PERSON BEHIND ORVANE

Liplan Lekipising

Founder of Orvane · Senior software engineer

Based in Kenya, I build websites and products, lead engineering teams, and take responsibility from the first decisions to production.

My experience includes web engineering leadership at Hello Tractor and senior engineering and team leadership at Knack. I work across product, design and engineering to turn complex requirements into experiences people can use.

Career and independent work

Sofie Saitet Foundation
Client website and operational tooling

GaiaVie
Client booking platform

Timi
Independent WhatsApp sales product

These are Liplan’s personal portfolio projects, not Orvane client engagements.

From brief to handover

1. Understand your business, customers and current website.
2. Agree the scope, content responsibilities, price and dates.
3. Build, review, test the agreed journeys and provide a documented handover.

We reply within one working day.

30 calendar days of post-launch defect support. A defect is a failure against the agreed scope; additional changes need a separate agreement.

AGREE THE WORK BEFORE KICKOFF

Prices and practical details.

Website Improvement

KES 29,000-59,000

Typical delivery: 5–10 working days.

Launch & Impress

KES 55,000-95,000

Typical delivery: 3–5 weeks.

Typical delivery after agreed content and access are ready. Final dates are confirmed in your proposal.

Ongoing options

Website Care - Quoted by scope

Agreed monitoring, content or software updates, backups where applicable, and support. Frequency, responsibilities and response arrangements are defined in your proposal.

Enquiry Tracking - Quoted by scope

Measure agreed form submissions and call or WhatsApp clicks, with a clear handover. Clicks and submissions are interaction signals, not verified qualified leads.

Your proposal confirms deliverables, taxes, hosting and renewal costs, licences, payment milestones, revision allowances, and ownership and account-access terms.

Rankings, enquiries and revenue are not guaranteed. Scorecards are focused public reviews, not full-site audits.

Discuss the next step with Liplan

We reply within one working day.
